REPORT OF THE BOARD OF EDUCATION.

In compliance with the requirements of the law, we hereby submit our annual report, and in so doing make a few suggestions which we think necessary for the best interests of our schools. One of the greatest obstacles to success with which we have to contend is the irregular attendance of pupils. Every day that a scholar is absent makes a break in his studies which can never be fully recovered. We ask the co-operation of parents in aiding us to overcome this evil. Parents should require their children to attend school every day unless prevented by sickness.

Another evil is the habit of perpetual fault-finding with teachers, thereby indirectly encouraging the scholar to disregard the rules of the school. Parents should remember that they do their children irreparable injury, generally, by taking their part at school. Is it unreasonable to ask parents to unite with us in our efforts to elevate the standard of our schools, and increase their usefulness by requiring greater thoroughness in study and discipline? Our educational interests are of vital importance. Increased knowledge tends to better the condition of society in all respects. The common school is a priceless legacy left us by our fathers; let us see that our children secure its benefits.

By improving the advantages which the law gives us in our common schools, a good education is within the reach of rich and poor alike; and with it the young will be better prepared for the struggle of life.

Taken as a whole, our schools for the past year have been successful. The number of pupils is much smaller

than formerly, owing to the large attendance at the parochial school, which is in successful operation under the supervision of Rev. I. H. C. Davignon, having from 250 to 280 scholars.

Miss Scribner, who has taught the grammar school for the year, came highly recommended as a first-class teacher, and we know of no reason why she has not fully sustained that reputation. She labored faithfully and impartially for the interest of the whole school, and we think to the satisfaction of all.

Mrs. Stearns, the teacher of the primary school, has worked conscientiously for the advancement of her scholars, and with very good success.

Miss Fowler, in the rural school, devoted her time and talents faithfully, and notwithstanding the small number of scholars and irregular attendance, succeeded in having her scholars make good progress. The order was perfect.

The number of children in town between the ages of five and fifteen, as returned by the selectmen, is—boys, 136; girls, 128; whole number, 264. There are about 100 attending the parochial school, with 67 in our school, leaving about 100 not attending any school.
